# High Security Chauffeur Services

*"It is a fact that one of the most common times for attack scenarios is while en-route or during transition around a vehicle."* - ANTHONY RICCI, PRESIDENT, ADSI

For many VIP's and high-profile targets it is a necessity of modern day life to provide protection for themselves and their family. A security driver is important part of this and plays a vital role that should not be overlooked. Risk will never go away, but using a trained security driver will ultimately minimize potential risk.

## **So how is a Forte Security Driver different from a regular chauffeur or taxi driver?**

- Alert to many potential risks that simply pass unnoticed by a regular chauffeur and attempt to avoid danger before it arrives.
- Better skills and judgment level to avoid potential threats or attacks and will have been trained to react quickly, while in motion or otherwise, and be prepared to move at a moments notice.
- Knowledge of security manoeuvres, fully trained in defensive and evasive driving techniques, and awareness of the vehicles' capabilities and safety features both active and passive.
- Ability to safely execute emergency or evacuation manoeuvres.
- Knowledge of how motorcades work, of proper vehicle positioning in the motorcade, as well as knowledge of how different vehicles present different problems, both in a motorcade and in regular driving scenarios
- Understand the need for route surveys, contingency plans and know where to go if something happens
- Has an in-depth local route knowledge and knows all primary and secondary routes and all react routes such as routes to hospitals and safe havens.

# Malta Movies & Media Events

There's no business like show business...

... but it is a business we know.

Through years of practical experience we have acquired an intimate understanding of the specialised requirements of various key cast and crew members. We understand that this is a serious business where schedules are tight and transport delays can be very costly.

Whether interpreting complex location itineraries, or dealing with inevitable changes to shooting schedules, working as part of a driving team or acting independently, we continually aim to fulfill all practicable requirements.

Resourcefulness, adaptability, great communication skills along with discretion and sensitivity to the needs of our passengers are just a few of the reasons why Forte is the first choice of transport co-ordinators.
